Reducing Crime in Derbyshire

Reducing crime in Derbyshire is top of the agenda for Conservatives. The Chancellor's latest spending round shows our commitment to fight crime.

- An extra £750 million is set aside to provide 20,000 more police officers.
- 6,000 to be in place by 2020-21.
- An extra 10,000 prison places to be created using £2.5 billion spending commitment with additional funding for probation reforms that will help reduce reoffending.

Angelique Foster the Conservative candidate in this year's Police and Crime Commissioner elections said "The substantial amounts made available to support our police, probation service and prison officers are very welcome and reflect our promises to tackle crime and keep people safe"

Angelique speaking about what she would do as PCC added "I would make sure Derbyshire gets its fair share, that taxpayers money is spent wisely and residents see a real difference in their communities"

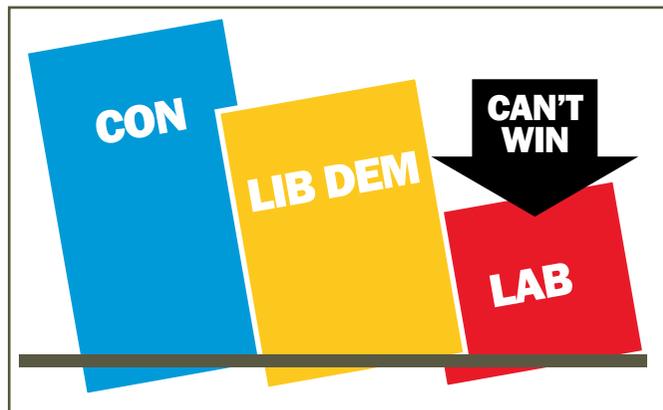

Three good reasons to vote for John :

- Working with a Conservative MP and Conservative County Council to get things done
- Will fight against over development without appropriate infrastructure
- A proven record of fighting for residents in rural communities

ROBERT LARGAN MP FIGHTING FOR A BETTER TRAIN SERVICE

Local commuters continue to experience train delays, cancellations and overcrowded carriages. Passengers are paying more but Northern Rail's performance continues to get worse and worse.

Robert Lorgan MP has been calling for the Government to step in and take action over the failing franchise. In one of his first acts as our new MP, Robert raised the poor performance of Northern Rail in Parliament and called on the Government to bring forward badly needed investment in our local railway infrastructure.

Robert Lorgan MP commented: "Northern Rail's performance is simply unacceptable and its time the Government stepped in. But franchising is only part of the problem. Over the last few decades, governments of all parties have failed to invest in rail infrastructure in the North. That's why I've been pushing for a review of the Treasury rules to change our approach to infrastructure investment."

ROBERT RAISES A&E PERFORMANCE AT STEPPING HILL

Robert Lorgan MP has highlighted the worrying performance figures at Stepping Hill Hospital and has urged the Government to bring forward the planned construction of a new £30.6m Urgent Care Centre. In response, the Health Minister confirmed the construction of the new Emergency Care Campus is due to begin next year, earlier than first anticipated.

Robert commented: "The NHS has saved my life twice and I will always defend it. I am determined to get the new Urgent Care Centre for Stepping Hill as soon as possible."

JOHN WALTON

We'd like to introduce our candidate, John Walton. John was a highly successful High Peak Borough Councillor who put residents first.

As Borough Councillor, John fought against over development, resolved parking issues, supported many local services and organisations and fought for accessibility of postal services across the borough. John will work closely with our newly elected MP, Robert Lorgan, and our Conservative County Council to get things done.

Please support John Walton on Thursday 13th February 2020.

JOHN'S PLEDGES TO YOU...

John will work hard with the County Council to implement a new, safer place for lorries to access Bings Industrial Estate from Buxton Road.

John will fight for a footbridge to be installed on Green Lane to allow pedestrians safer access in and out of Chinley.

Funds have been released by the County Council to ensure flooding in Combs is reduced, John will ensure the council follow through on this project.

Pictured: John Walton with Cllr Jim Perkins, who has been overseeing the Whaley Bridge ward for the past few months.

John has never supported building where infrastructure is not suitable. With the recent crisis at Toddbrook dam, John believes the development at Linglongs needs further investigation before any final decision is made.
